Bootstrap Grid System

The “Grid System” helps lay out and align content. When we import Bootstrap’s grid system, we create 12 groupable columns we can manipulate to structure our website.

Examples:

Column 1

Column 2

Column 3

HTML  

```
<div class="container text-center">
  <div class="row">
    <div class="col">
      Column 1
    </div>
    <div class="col">
      Column 2
    </div>
    <div class="col">
      Column 3
    </div>
  </div>
</div>
```

Column 1

Column 2

Column 3

HTML  

```
<div class="container text-center">
  <div class="row">
    <div class="col-2">
      Column 1
    </div>
    <div class="col-4">
      Column 2
    </div>
    <div class="col-6">
      Column 3
    </div>
  </div>
</div>
```

Name: _____

Date: _____

Task:

For each row, group the columns to fit the specified arrangement. Write the number of columns in each group. The first one has been done for you.

2 groups, equal width

[illegible]

col-6

col-6

3 groups, equal width

[illegible]

1 large group, 1 small group

[illegible]

1 small group, 1 large group

[illegible]

1 small group, 1 large group, 1 small group

[illegible]

Make your own!
