Lesson:

Parallax Scrolling **is** where the background content (i.e. an image) is moved at a different speed than the foreground content while scrolling.

Modeling Example:

How to add code for
parallax scrolling?

Modeling:

How to add code for
parallax scrolling?

w3schools

Bootstrap

Modeling:

w3schools

Bootstrap

```
1  .parallax {  
2  
3      /* The image used */  
4      background-image: url("img_parallax.jpg");  
5  
6      /* Set a specific height */  
7      min-height: 500px;  
8  
9      /* Create the parallax scrolling effect */  
10     background-attachment: fixed;  
11     background-position: center;  
12     background-repeat: no-repeat;  
13     background-size: cover;  
14 }
```

html:

```
<div class="parallax"></div>
```

Modeling:

w3schools

```
1  .parallax {  
2    /* The image used */  
3    background-image:   
4    url("img_parallax.jpg");  
5  
6    /* Set a specific height */  
7    min-height: 500px;  
8  
9    /* Create the parallax scrolling  
10   effect */  
11    background-attachment: fixed;  
12    background-position: center;  
13    background-repeat: no-repeat;  
14    background-size: cover;  
15  }
```

html:

```
<div class="parallax"></div>
```

Bootstrap

Modeling: w3schools

html:

```
<div class="parallax"></div>
```

```
1 .parallax {  
2   /* The image used */  
3   background-image: url("img_parallax.jpg");  
4  
5  
6   /* Set a specific height */  
7   min-height: 500px;  
8  
9  
10  /* Create the parallax scrolling effect */  
11  background-attachment: fixed;  
12  background-position: center;  
13  background-repeat: no-repeat;  
14  background-size: cover;  
}
```

Modeling:

Go to [w3schools](https://www.w3schools.com):

Use one of the two following code:

→ Example with pixels

→ Example with percent

Classwork:

- ❏ Find an image for the background
- ❏ Create the parallax effect

Success Criteria:

I will

- ◆ describe parallax scrolling
- ◆ add code to my website that demonstrates parallax scrolling
